FREE WEBINAR

Just in the last few months, new technologies and global shifts have pushed traditional definitions of education and schooling even further into question. That's why it's so important to stay on top of the current technological trends. In this Webinar coming up on January 23rd, Big Questions Institute Co-Founder Will Richardson will discuss how educators can keep "One Foot in the Future", while at the same time navigating the complexities of the present. Educators can no longer "wait and see" what happens next. Instead, we must now see and feel the future we want beforehand and create it with imagination and hope. Register for the FREE Webinar on January 23rd at 10am MT and join the conversation!
